

GASOLINE TANKS LESS THAN 500 GAL.

Tanks meeting one of the following criteria:

- Tanks with a capacity of 550 gallons or less used exclusively for fueling of implements of husbandry, or
- Tanks with a capacity greater 250 gallons and no more than 2000 gallons installed prior to July 1, 1975.

Applicable Requirements and Compliance Certification (Farms located in San Joaquin Valley Air Pollution Control District)

This form may be used in lieu of standard form "Part D – Compliance Certification." If you choose to use this form, it must be accompanied by the Applicable Requirements and Compliance Certification form for General Farming Operations in San Joaquin Valley, and other equipment and operation forms as applicable. Refer to the attached San Joaquin Valley – Part D instructions for more information.

1. Equipment Description - Describe gasoline tanks.			
	Tank Designation	Capacity (gallons)	Above-ground or underground
Example	South Tank One	380	Aboveground
1.			
2.			
3.			
4.			
5.			

2. Applicable Requirement(s) Applicable Rule, Regulation, & Section number that the gasoline tanks must comply with.	3. Method used for determining compliance. This is the primary method used to determine the tank is in compliance with the applicable requirement.	4. Compliance Status for all tanks listed above (Use a separate form for tanks with varying compliance status)
Rule 4621 - Tank must be equipped with permanent submerged fill pipe	<p>1. I have knowledge that a permanent submerged fill pipe has been installed, <u>and</u></p> <p>2. The fill-pipe is maintained such that the discharge opening is entirely submerged when the liquid level is six inches above the bottom of the tank.</p>	<p><input type="checkbox"/> in compliance with rule 4621 and I will continue to comply with all requirements.</p> <p><input type="checkbox"/> not in compliance with rule 4621 at this time, but I will be by: ___/___/____ (submit plan per instructions).</p>
